NICE

Incremento en la satisfacción del cliente por medio de Analytics – Banco BMG

Background

One of Brazil's leading retail banks, primarily providing credit card payroll loans. The bank's two contact centers are in the Brazilian states of Minas Gerais and Goias.

- 3.8 million clients
- Over 600 branches
- 14,000 remote representatives
- 500 contact center agents
- 4.8 million interactions annually

NICE Solutions

- Nexidia Analytics

Solution Highlights

Implemented comprehensive speech analytics
- Began capturing 100% of customer interactions
- Detected customer dissatisfaction in real time
- Monitored calls for flow and excessive non-talk time

Leveraged data for greater efficiency
- Identified where validation efforts could be automated
- Tracked results for individuals and teams
- Centralized analytics management

Customized analytics and reporting
- Adapted for three business areas (sales and credit, customer service, and the ombudsman's office)
- Focused analysis on service quality, operational effectiveness, and detecting fraud through custom KPI's
- Produced monthly reports both on a recurring basis and ad hoc

Banco BMG

Impact

- 50% reduction in dissatisfied customers
- 41% reduction in non-talk time
- 20% reduction in AHT

Industry

Financial Services

"Once we started acting based on Nexidia metrics and analysis, we saw dramatic, measurable results." -- Flávio Vinicius , Customer Experience Manager

Eficiencia operativa y gestion de recursos en operaciones Digitales – Teleperformance

Background

World Wide Leader in Omnichannel Customer Experience Management

- +19,000 employees (Brazil);
- 300,000 interaction experts worldwide
- speaking 265 languages and dialects.
- 3.8 million clients
- Handling billions of unique interactions worldwide

NICE Solutions

- WFM
- Desktop Analytics

Solution Highlights

Need for digital operations quality and performance management
- Growing demand
- Lack of visibility, planning and staffing tools

Teleperformance
each interaction matters

Desktop Analytics with Workforce Management
- Initial Implementation in 2017
- Growing year over year Teleperformance has now the largest number of desktop analytics licenses in Brazil
- Engaged all applicable areas and practices in each operation WFM, Quality, Processes, IT and operations.

Evolving and impacting
- mature methodology optimized based on the user experience, and by process improvements driven by Six Sigma.

Impact

+16 p.p. of schedule adherence

Tikets per hour: from 14.6 to 16.3 in 12 months
+12% in productivity

Industry

BPO

"With Desktop Analytics we could measure productivity and operational efficiency in digital operations, Resulting significant improvement in adherence due to seamless integration, analysis and better monitoring of operations." – Joao Teodoro, Solutions Senior Manager
